# THE GOLDEN EDITION SALE

# Tuesday 11th February 2020 - 3:00 pm Offering 65 Angus Bulls

Bull Sale Videos: www.littlemeadowsangus.com.au

# J-BAS 8

Sale Address: 119 Poad Road, Crooked Brook, WA 6236

Our 2020 sale team is available for inspections on-farm at any time prior to the sale along with a selection of private sale bulls.

# Please phone Tony and Karen Golding: 0429 932 447 Mostyn Golding: 0428 477 313 Email: info@littlemeadowsangus.com.au To Bunbury via Picton Web: www.littlemeadowsangus.com.au Dardanup Vendor: Little Meadows Angus Tony & Karen Golding & family 4.4km Agent: **Delaney Livestock Services** Poad Rd Daniel Delaney: 0488 787 778 Boyanup-Picton Rd **Primaries:** <u> Primaries</u> Rhys Hebberman: 0477 646 264 5.6km **Auctioneer:** Glasser Total Sales Management Micheal Glasser 0403 526 702 Boyanup Boyanup North Rd

# **GENERAL INFORMATION**

# AGE OF SALE BULLS: 14-21 MONTHS OF AGE

After a change in our calving pattern to a winter calving for commercial reasons, the bulls we will offer for sale each year will be 14 -21 months of age at our sale date.

## **SELLING SYSTEM:**

Sale of bulls will be conducted as a ring sale auction. Video's of select bulls will be available on LM website. All bulls will be penned for inspection prior to the sale.

## **FERNWOOD ANGUS:**

Little Meadows would like to welcome to our sale, 'Fernwood Angus', owned by John and Dale Jansen, Gingin.
Bulls are bred by the Jansen's and purchased by LM upon weaning. The bulls are LM genetics and are fully guaranteed by LM. We look forward to a long and prosperous relationship with Fernwood Angus into the future.

## **FERTILITY AND PHYSICAL EXAMINATION**

All bulls have been examined for breeding and structural soundness. They have been semen tested and guaranteed for fertility.

# WEIGHT AND MEASUREMENTS

Scrotal circumference measurements that appear in the catalogue were collected on December 6th, 2019. All bulls will be weighed prior to sale and these weights will be available on sale date. Max Bowman scanned all bulls for carcase evaluation on December 6th, 2019.

# **GUARANTEE**

All Little Meadows and Fernwood bulls are guaranteed for up to three years from the date of sale. Every effort has been made to ensure our bulls leave Little Meadows in top working order. However, should any Little Meadows and Fernwood bulls prove to be infertile or incapable of service we undertake to:

-Issue a refund equal to the purchase price less the salvage value and is calculated on the basis that the amount is reduced by one third for each year of service from the date of sale.

The guarantee covers the purchase value of the bull, without interest, cost and damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Little Meadows. A veterinary certificate must be supplied by the purchaser upon request.

## **HEALTH**

All bulls offered for sale have been tested PI negative and vaccinated with Pestiguard, Vibrovax & 7-in-1 and are guaranteed free of Brucellosis, TB, Mannosidosis and Johnes Disease. WA has been declared Johnes free and bulls can go to all states. Little Meadows is J-BAS 8.

# RECESSIVE GENETIC CONDITIONS

All bulls are tested or are by inheritance, free of all genetic conditions except Lot 29 (CAC) and Lot 33 (CAC). There are four main genetic conditions within the Angus breed. They are AM (Arthrygroposis Multiple (Curly Calf)); CA (Contractual Arachnodactyly (Fawn Calf Syndrome)); NH (Neuropathic Hydrocephalus) and DD (Developmental Duplications). For the condition to be expressed, the undesirable gene needs to be present on both sides of the pedigree; both the sire and dam must be carriers.

# SALE CONDITIONS

The conditions of the sale are those displayed on sale day by the selling agents.

Agent

Delaney Livestock Services

A 3% rebate is offered to outside agents who nominate their client(s) by email to littlemeadows6@bigpond.com 24 hours prior to sale. Agents must attend the sale with or on behalf of their client(s) in order to claim rebate.

# **DELIVERY OF BULLS**

# No bulls to be picked up or delivered on sale day.

We recommend that all bulls be insured that are remaining at Little Meadows. Bulls that remain at Little Meadows do so at purchasers risk.

# \*\*DISCLAIMER

All information in this catalogue is believed to be true and correct. No responsibility taken for errors or omissions.

# THE LM ADVANTAGE

## **OUR FEMALE HERD**

We carefully choose our genetics and each individual female is mated to a specifically selected sire which best suits its phenotype and EBV figures.

The primary focus of our program is the maternal function of our females. Mating decisions are always made with a vision of the female progeny uppermost in mind, rather than specifically setting out to breed bulls.

We believe in breeding roomy, wedge shaped females that have plenty of pelvic room to calve easily that also give our clients heavier calves at weaning.

#### **CARCASE PROFITABILITY**

We strive to continue to breed bulls with elite carcase weights, EMA and IMF figures and have tailored our breeding program to produce genetics that will produce higher quality beef to suit our higher valued markets, both domestic and export. The soft skin, smooth muscle pattern on our cattle has been noticed by many and we feel is a good indicator of fine meat quality.

The Little Meadows 2020 Sale Bulls are on average 17.75% above breed averages for EMA, 9.14% above breed average for Carcase Weight, 7..54% above breed average for 400 day weight, 10% above breed average for 600 day weight and Scrotal Size 9.06% above breed average. Please see page 6 for more details

# AGE PERFORMANCE

LM Angus is one of minority in WA to sell young yearling bulls at 14-months-of-age. We have been selling our yearling's for several years and it is evident these elite young-sters are performing, with a continuous demand at auction and through private selection.

# **ACCURATE DATA**

LM Angus has an extensive system to record all data so that it is accurate as possible. 100% of the LM herd is herd book registered (HBR) and on BREEDPLAN.

## **DEDICATED FAMILY**

As a family we work together to make LM a leader in Angus genetics and ensure our customers are happy with their investment.

## **CUSTOMER SERVICE**

We are committed to help our clients achieve their goals and back our animals. We have worked with clients to match their environment and production system to get the most profit gains using our leading genetics.

## **SIRE GUARANTEES**

All LM and Fernwood bulls are guaranteed for up to three years from the date of sale. We believe a sale of any animal is the beginning of a relationship with a client, rather than a deal.

## **GENETIC CONDITIONS**

There are four main genetic conditions within the Angus breed and all LM sale bulls are tested or are by inheritance free of them.

# RING SIDE

As a family we have been showing cattle since 1982 and have done so to showcase the quality of our female family lines to the industry.

# UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

# What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

# What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

# Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

# Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

# **Considering Accuracy**

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

# **Description of TACE EBVs**

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following pages.

# **UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)**

		BIRTH	
Calving Ease Direct	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
		GROWTH	
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
		FERTILITY	
Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
		CARCASE	
Carcase Weight	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
Eye Muscle Area	cm²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.

		FEED EFFICIENCY	
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
		TEMPERAMENT	
Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament
		STRUCTURE	
Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
		SELECTION INDEXES	
Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# THE BENEFITS OF BUYING YOUNG BULLS

The purchase and use of bulls 18 months or younger offers stock man lower bull costs but more importantly higher production and less injury throughout their working life.

Majority of seedstock producers in Western Australia sell two year old bull at auction however over recent years its been proven by producers in the East that this 'two year old system' is full of inefficiencies.

Bulls originally evolved to start working at 12 to 14 months of age when they are lighter and more agile, yet most Angus bulls in Australia aren't put out to work until they are two years of age. Often they are fed throughout this period and at auction have reached heavy, mature weights and are normally over conditioned.

Unfortunately this results in inefficiencies that only come out of the bull buyer's pocket.

Higher auction prices for over conditioned two year olds Increased injury due to their heavy, mature weight and sexual inexperience Higher maintenance costs

The average working life of a bull is less than three years and to us this is not a very satisfactory performance for one of the main operational costs of a beef enterprise. Hence our move in using younger yearling bulls many years ago. Since then we have achieved some great results and knew by offering younger bulls to our clients it would not only boost their herds profitability but they would also reap the added benefits:

A longer working life (25% increase or more)
Significantly reduces costs per calf
More calves on the ground
Faster rates of genetic improvement
Significantly less injuries due to superior fitness and lower levels of body fat.
Easier management.

From clients and our own experience young bulls settle in better, mix with other cattle more easily and are easier to handle than older bulls. We believe this is because they are working at a much younger age

and have not built-up the sexual frustration that encourages them to fight.

We would agree from experience that younger bulls can look unpleasant after their first joining season and due to them being in their working cloths at a young age they probably wont reach their genetic potential for mature weight until they are three or four year olds. Nonetheless the relationship between the age of a bull at joining has proven to have no effect on the weight of his calves and should be seen as a benefit as it contributes to their higher levels of fitness and agility throughout their life.

"If the beef industry is to make progress we MUST purge our minds of the belief that a bull has to be

"If the beef industry is to make progress we MUST purge our minds of the belief that a bull has to be fat and well grown to be any good. THE VALUE OF A BULL SHOULD BE MEASURED BY HIS OFFSPRING, NOT ON WHAT HE LOOKS LIKE!" Said cattleman Sandy Yates.

British bred yearling bulls will be sexually mature if they are prepared well. It is critical that our young sale bulls are rigorously culled if they are not well grown and aren't structurally sound. To ensure this we apply a strict weaning, nutrition practice to deliver bulls that are.

Well grown (14 months of age or older and averaging 550kg plus)

In sound condition (fat score of high 2 or low 3)
Sexually mature with a scrotal size greater than
35cm at 14 months of age
Docile and manageable

Mating management is extremely important when using young bulls in your operation and some guidelines should be meet.

Join them with up to 35 females in the first year and normal levels thereafter DON'T join them with older bulls. Join either by themselves or with other young bulls of the same age and weight A six to eight week joining period is recommended Check their body condition score, like any bull if he gets too lean (BCS <2, you risk him not performing)

# **BUY WITH CONFIDENCE**

The STAR BREEDER program aims to maximise the reproductive integrity and health of stud and commercial stock.

A STAR BREEDER certified animal has been:

Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals

Vaccinated against Pestivirus (BVDV) to ensure they are protected from the effects of this infection

Vaccinated against Leptospirosis, a reproductive disease and potential WH&S risk for cattle handlers

Vaccinated against Vibriosis, a sexually transmitted cattle disease

You can be confident that every step has been taken to ensure these animals will not introduce preventable reproductive diseases into your herd. For more information talk to your Zoetis Cattle Representative, call 1800 963 847 or visit starprogram.com.au

We encourage all members to look for and support the Star Breeder Program.

# TIGHTENING CALVING PATTERNS

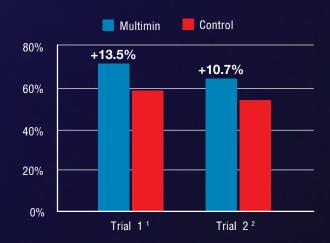

Improving the number of heifers and cows that conceive in the first or second cycles can dramatically tighten the calving pattern. Ideally, about 65 to 70% of cows should conceive during the first cycle, 20% in the second cycle and 10% in the third cycle to ensure the majority of calves are born within nine weeks to coincide with seasonal pasture availability.

# WHY MULTIMIN INJECTION?

Applied a month before breeding, Multimin has been shown to improve the number of conceptions in the first cycle by 10 to 13.5%.<sup>1,2</sup> There is evidence to suggest that this effect is even greater in younger breeders, particularly second calvers.<sup>2</sup>

# 1. Mundell, L. et al. (2012), Effects of prepartum and postpartum bolus injections of trace minerals on performance of beef cows and calves grazing native range, *The professional Animal Scientist*, 28:82-88.\* 2. Virbac trial protocol No. 578/15. Tightened calving patterns is not a registered label claim.

# Effect of Multimin on conception at first cycle<sup>1,2</sup>

Shaping the future of animal health

# Excellence in stock feed since 1985

Our main goal is to produce quality feed for the purpose of good animal health and nutrition. The best way for your animal to receive the vital nutrients and energy it requires is through a natural product which is made to order to ensure freshness, consistency and palatablity.

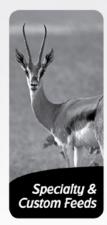

All pellets contain the minimum requirements of vitamins and minerals to maximise optimum growth.

Fortified with Advanced Feeds vitamin and mineral premix.

Bulk Mill - Kojonup & Wandering

Uses quality Western Australian produce supporting our local farming communities.

Manufactured in WA and delivered fresh to you.

Our pellets keep their natural flavours.

Cost effective feed of exceptional quality resulting in greater performance and yields.

Thompson & Redwood 2001 Pty Ltd - Stock Feed Manufacturers & Wholesalers

# **BLACK DOG RIDE CHARITY HEIFER**

This year we joined forces with local Black Dog Ride community leaders, Peter and Judy Milton in raising awareness of depression and suicide prevention, particularly amongst primary producers.

We decided to offer one of our elite young females, Little Meadows Wilcoola P7 (AI) (ET) for auction at the 2019 Royal Melbourne Angus Feature Show, joining the 100year celebration of the Angus Society of Australia.

In doing so we raised \$26,000, with Semex general manager Jim Conroy taking the winning bid on behalf of a four-member syndicate which bought the heifer.

The syndicate included P.J Cattle Co, Hamilton, VIC, Jim Conroy, Bacchus Marsh, VIC, Fernwood Angus, Gingin, WA and Euroz Securities Limited, Perth, WA.

Peter said the reception and reaction we received at Melbourne from breeders and the general public just passing by was overwhelming.

"What we achieved there was beyond our expectation and we are very grateful for the support of eve<mark>ryon</mark>e, particularly to those who donated further to the cause and boosted the \$26,000 to more than \$40,000."

Tony (left), Mostyn and Karen Golding, handler Tiffany McLauchlan, PJ Cattle Co, Hamilton, Victoria, Peter Milton, Dardanup and Jim Conroy, Semex with Little Meadows Wilcoola P7 (Clementine 6), which was sold at the Royal Melbourne Show for \$26,000 with all proceeds donated to the Black Dog Ride.

In supporting the Milton's, we offered them a heifer, LM Edwina P86 to take on their travels to the Kimberly in June and July with the aim to raise awareness of mental illnesses in rural and remote regions.

She travelled as far north as Kununurra and went to many community engagements, including private and public

schools, mine sites, cattle stations, shopping centres and men sheds.

She helped spread the message "It's important to let people know it's ok to say you're not ok."

Black Dog Ride community leader Peter Milton with LM Edwina P86 (Clementine 4) pictured next to the big crocodile in Wyndham, WA

### DISCLAIMER AND PRIVACY INFORMATION

**ATTENTION BUYER:** Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

### Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name are as follows:

PV: both parents have been verified by DNA

SV: the sire has been verified by DNA

DV: the dam has been verified by DNA

#: DNA verification has not yet been conducted

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

### **Privacy Information**

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

### BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

	If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.
	I, the buyer of animals with the following idents
	from member(name) do <u>not</u> consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.
I	Name: Signature:
	Date:
I	Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

K5X WHITNEY L63 OWNED IN PARTNERSHIP WITH MERRIDALE ANGUS DAM OF LOT 4

2019 Perth Royal Show All Breeds Supreme Junior Champion Beef Female, Little Meadows Wilcoola P9 (AI,ET). With her is Trinity Edwards and International Animal Health representative Allison Domney.

LM Pavlich P2 (AI) exhibited at the 2019 Sydney Angus Feature Show in April at 13 months, weighing 716kgs. P2 has recently cover mated 55 mature females and currently weighs 834kgs.

Te Mania Newly N549 Syndicate spokesman Bryan Corrigan, Rennylea, said the impressive young sire would be kept at Pathfinder and shared with Booroomooka, Bingara NSW, Little Meadows, Crooked Brook WA, Khancoban Station, KhancobanNSW and McRae Pastoral at

# "To breed good bulls you must have GREAT females"

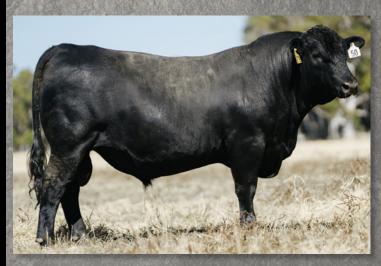

Is a phrase we often refer to here at LM Angus. As third Generation farmers, with a background in the Holstein industry, we understand the significance of females and their continuing genetic influence in a herd. They are the foundation to our breeding program and as we continue to increase our herd numbers we are strongly focused on our family lines, their genetic performance, high fertility, milking ability and structural soundness.
